

Dr. William F McIntyre
MD FRCPC

William is a cardiologist and a native of Fredericton, Canada. He completed Medical School and Internal Medicine at Queen's University. He completed Adult Cardiology Residency at the University of Manitoba.

William is now enrolled in the Clinician Investigator Program at McMaster University. He is pursuing clinical training in arrhythmia and a graduate degree in health research methods. His training is supported by fellowship grants from the McMaster Cooper Foundation and the Canadian Stroke Prevention Intervention Network.

William has published over 40 peer-reviewed articles. He is currently the Section Editor for the Residents and Fellows Corner of the Journal of Electrocardiology and a member of the Editorial Board for the Canadian Journal of Cardiology. His current research program, supervised by Dr. Jeff Healey, is investigating recurrence rates of Atrial Fibrillation Occurring Transiently with Stress (AFOTS). This work is supported by peer-reviewed research grants from the Canadian Cardiovascular Society (CCS)-Bayer Vascular Awards program and the CCS AF Awards program.
